The following action is in response to the amendment received July 22, 2004.

Specification

Applicant's amendment to the specification overcomes the objection set forth in the previous Office action. The objection to the specification is withdrawn.

Allowable Subject Matter

Claims 1-7 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The amendment to claim 4 overcomes the rejection under 35 USC 112, second paragraph, set forth in the previous Office action. The rejection under 35 USC 112, second paragraph, is withdrawn.

The terminal disclaimer filed July 22, 2004 has been approved and thus the obviousness-type double patenting rejection set forth in the previous Office action is overcome. The obviousness-type double patenting rejection is withdrawn.

Claim 1 is interpreted to claim the actuator in combination with the service brake actuator shaft since the shaft, initially recited in the preamble, is positively recited in the body of the claim. Furthermore, the "means for transferring the rotative energy of the clock spring to the actuator shaft" is seen to invoke the sixth paragraph of 35 USC 112

Art Unit: 3681

and thus covers the corresponding structure described in the specification and equivalents thereof.

None of the prior art of record shows or renders obvious a spring brake actuator as recited in claim 1, including a clock or spiral spring attached at an outer end to the housing and mechanically charged at a rotation of the actuator shaft in a brake applying direction, an electric coil for keeping the clock spring in its charged condition, and transfer means transferring the energy of the spring to the shaft in a brake applying direction when the coil is deenergized and allowing free rotation of the shaft in either direction when the coil is energized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
